

Commodore READY.

- **Never wet or wash a Diskette.** Dust it with a soft brush if necessary. Compressed air in a spray can may also be used to blow dust away.
- **Heat is one of your Diskettes' worst enemies.** Never store a Diskette in direct sunlight. Keep it away from excessive heat in general.
- **Never BEND the Diskette.** Handle your Diskettes with care, especially when loading or unloading them into the Disk Drive.
- **Never attach paper clips to a Diskette.**
- **Never write on a Diskette or on the identification label of a Diskette with an erasable pencil or a ball-point pen.** A fiber-tip pen is recommended for writing on the label.
- **Magnetic fields are another of your Diskettes' worst enemies.** A Diskette exposed to a magnetic field will lose data. Keep Diskette away from magnets and electrical equipment (even telephones and television sets).
- **Never touch the Diskette itself where it is exposed through the small "windows" in its protective envelope.** It is not necessary to turn a Diskette in its envelope, the Disk Drive will take care of that.
